

1. COURSE DETAILS

Programme: Chemical Engineering
Course: # Inplant Training
Course Code: IPT190625

Semester: V
Group: A*
Duration: 26 Weeks

2. EXAMINATION SCHEME

| Course Name | Training Duration | Credits | | Weekly Report | Quiz Test | Dissertation (Report) | Oral/Viva | Total | Group (Gr) |
|-----------------------------------|-------------------|---------|---------------|---------------|-----------|-----------------------|-----------|-------|------------|
| # Inplant Training (IPT190625) | 26 Weeks | 20 | Maximum Marks | 50 | 50 | 50 | 50 | 200 | A* |
| | ** | | Minimum Marks | 20 | 20 | 20 | 20 | 80 | |

**Total Inplant Training Duration 26 weeks equal to 24 weeks actual training plus 2 weeks examination and processing

*Compulsory, # Award Winning, Weekly Report and Quiz Test are assessed by Internal Examiner Only, Dissertation and Oral/Viva are Assessed by Internal and External Examiner Jointly

Gr- Group, B - Basic, C - Core, A - Application, M - Management

3. COURSE OBJECTIVE: -

The inplant training facilitates students to understand the various domains of chemical industry along with work environment and the students are exposed to the latest developments in technologies. By exposing and interacting with the real-life chemical industry set up, student will appreciate and understand the actual working and best practices adopted in the chemical industry. This short association with industry will be instrumental in orienting the students in transforming them into chemical industry ready output after completion of diploma program.

4. SKILL COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences.

- **Soft Skill including Communication, Presentation and liaising etc.**
- **Life skills including Time management, Safety, Innovation, Entrepreneurship, Team building etc.**
- **Hands-on including Reading Drawings and Design, Implementation and Quality Assurance aspects etc.**
- **Industry specific tools including Value Engineering, Concurrent Engineering etc.**

5. COURSE OUTCOMES(COs) At the end of the semester student will be able to: -

| CO No. | COURSE OUTCOME | Bloom's LEVEL |
|---------------|---|----------------------|
| CO1 | Communicate effectively (verbal as well as written) the work carried out. | Apply |
| CO2 | Prepare and present the report of the work carried out. | Apply |
| CO3 | Exercise time management and safety in the work environment. | Apply |
| CO4 | Work in a team. | Apply |
| CO5 | Demonstrate various quality assurance. | Apply |
| CO6 | Interpret and solve routine technical problems through the application of engineering principles. | Apply |

6. IMPLEMENTATION STRATEGY (PLANNING)

Students shall be sent for 24 weeks inplant training in the V semester. Students understand basic working of industry and its work culture. Students are made aware about industrial safety norms. Before the training begins, the students are addressed by the Principal about rules, safety precautions and discipline to be maintained in the company during the training. The same is reminded by the institute supervisor on every visit. The company supervisor also takes care about students' safety

In the initial weeks company personnel train, the students about their manufacturing process and products. The students are involved inplant operation, process engineering, design and drawings, use of software and similar work.

Each company is visited by the institute supervisor on regular basis till the end of in plant training. Each student is monitored for performance, any difficulty, grievances and absenteeism. Accordingly corrective and preventive actions are taken.

7. EVALUATION CRITERIA

Each student performance is assessed by a company supervisor and is recorded in weekly report. The same record is maintained and assessed by the institute supervisor. Depending on the grades given by the company supervisor and also by examining the performance in the weekly report, marks are given out of 50 by the institute supervisor. Considering their work profile in the company, institute supervisor gives 5 quiz tests each of 10 marks (consisting of five questions each) to the students. The same are assessed by institute supervisor. The training report submitted by a student is assessed together by internal and

external examiner and accordingly marks are given out of 50. Students presents the work done by them in the company and are examined by internal and external examiner together for 50 marks, constituting total 200 marks. These marks are converted to out of 100 marks for final evaluation (for award of diploma). The external examiner appointed for inplant training examination is from industry.

8. COURSE EXPERT COMMITTEE MEMBERS

| SR.NO | | NAME | SIGNATURE |
|-------|----------|---------------------------------------|---|
| 1. | Internal | M. M. Belwalkar |  |
| 2. | Internal | R.D. Shimpi |  |
| 3. | Internal | N.R.Nagose |  |
| 4. | External | Manish Tiwari Organization: MASTME |  |

1. COURSE DETAILS

Program: Chemical Engineering

Course: #Process Instrumentation and Control

Code: PIC190616

Semester: VI

Group: A*

Duration: 16 Weeks

2. TEACHING AND EXAMINATION SCHEME

| Scheme of Instructions and Periods per Week | | | | | Examination Scheme and Maximum Marks | | | | | | | | |
|---|---------------------|-------------------|--------------------|----------------------|---------------------------------------|-------|-----|----|----|----|----|----|-------|
| Theory Hrs. L | Practical Hrs. P | Drawing Hrs. D | Tutorial Hrs. T | Credits (L+P+D+T) | Theory Paper Duration and marks (ESE) | | SSL | TA | TH | TW | PR | OR | TOTAL |
| | | | | | Hours | Marks | | | | | | | |
| 4 | 2 | -- | -- | 6 | 3 | 70 | 20 | 10 | 70 | 50 | 50 | -- | 200 |

3. COURSE OBJECTIVE

Monitoring and control of processes is an important activity of chemical engineer. The student must be aware of principles as well as applications regarding instrumentation and process control.

4. SKILL COMPETENCY:

Aim of this course is to help the students to attain following industry identified competency through various teaching learning experiences:

Apply Relevant Instrumentation and Process Control Parameters in the Chemical Plant.

5. COURSE OUTCOMES (COs) At the end of the semester student will be able to: -

| CO No. | COURSE OUTCOME | Bloom's LEVEL |
|--------|--|----------------------|
| CO1 | Identify measurement techniques for various process variables. | Remember, Understand |
| CO2 | Select the instruments for measurement of process variables. | Understand, Apply |
| CO3 | Identify various components of control system and their role. | Understand, Apply |
| CO4 | Apply the basic principle of control action. | Apply |

6. COURSE CONTENTS

| Sr. No | Topic/Sub Topic | Hours | Marks | Cos |
|--------|---|-------|-------|-----|
| 1. | 1.0 Introduction to instrumentation and process control 1.1 Measurement and its aim 1.2 Functional elements of a measuring system 1.3 Characteristics of measuring system : Static characteristics Dynamic characteristics 1.4 Steady state and unsteady process 1.5 Block diagram of automatic control system and its components 1.6 Introduction to DCS and simulation | 06 | 08 | CO1 |
| 2. | 2.0 Temperature : 2.1 Temperature scales 2.2 Liquid and gas filled thermometers 2.3 Bimetallic thermometers 2.4 Resistance thermometers (R.T.D) and Thermistors 2.5 Pyrometers Radiation pyrometer Optical pyrometer 2.6 Thermocouple | 09 | 10 | CO2 |
| 3. | 3.0 Pressure : 3.1 Elastic deformation elements 3.1.1 Bourdon pressure gauge 3.1.2 Bellows pressure gauge 3.1.3 Helix and capsule pressure gauge 3.2 Manometers 3.3 Measurement of differential pressure 3.4 Electrical pressure transducers 3.5 Measuring pressures in corrosive fluids 3.6 Bell gauges 3.7 McLeod gauge, vacuum gauge, Pirani gauge | 09 | 10 | CO2 |
| 4. | 4.0 Flow, Level, Density, Viscosity, Composition Measurements Flow: 4.1 Differential pressure meter such as venturi meter, orifice meter etc. 4.2 Variable meter such as rotameter, valve type meters Etc. 4.3 Positive displacement type flow meters 4.4 Velocity meter, mass flow meter, integrators etc. Level : Direct level measurement : 4.5 Bob and tape, sight glass, floats etc. indirect level measurement : 4.6 Liquid head pressure type 4.7 Air trap type, bubbler type 4.8 Measure of level based on radio active source | 14 | 14 | CO2 |

| Chapter | Contents | Hours | Marks | CO |
|---------|--|-------|-------|-----|
| | 4.9 Measure of level based on sound waves. Instruments for measuring : 4.10 Specific gravity 4.11 Viscosity 4.12 Electrolytic and thermal conductivity 4.13 Combustibility 4.14 Component analysis (Gas Chromatography) | | | |
| 5. | 5.0 Fundamentals of process control 5.1 Study of first order systems 5.2 Study of second order system (only theoretical study) 5.3 Types of lags, Transfer function 5.4 Types of forcing functions (step, impulse, ramp) 5.5 Feedback and feedforward system <i>Servo and regulator systems</i> 5.6 P&I Diagram of CSTR, Heat exchanger, Distillation column | 15 | 16 | CO3 |
| 6. | 6.0 Control Actions and Control Valves 6.1 Open loop and closed loop response 6.2 Control action – Definition, characteristics, Single mode action 6.2.1 ON – OFF control 6.2.2 Proportional control (P-action) 6.2.3 Integral control (I-action) 6.2.4 Derivative control (D-action) Two mode action: P+I, P+D. Three mode action: P+I+D 6.2.5 Comparison of various controllers based on control action. 6.2.6 Pneumatic controller circuits with amplifying Elements 6.2.7 Comparison of pneumatic controller and Electronic controller. 6.3 Control valves 6.3.1 Characteristics of linear and equal percentage valve 6.3.2 Different types of valves and valve positioner 6.3.3 Valve selection and sizing | 11 | 12 | CO4 |
| | Total | 64 | 70 | |

7. LIST OF PRACTICALS/ASSIGNMENTS/EXERCISES/TUTORIALS/DRAWINGS

Term Work consists of Journal containing minimum ten experiments/demonstration/ Assignments.

| Sr. No. | Title of Experiment/Assignment/Exercise/Tutorial/Drawings | Approx.Hrs required | Cos |
|---------|--|---------------------|-----|
| 1 | To study the components of Control System | 02 | CO4 |
| 2 | To determine the Response of Mercury in Glass Thermometer | 04 | CO3 |
| 3 | To determine the Response of Liquid Level Tank System | 04 | CO3 |
| 4 | To determine the Response of U-Tube Manometer | 04 | CO3 |
| 5 | To study measurement&calibration of Thermocouple | 02 | CO2 |
| 6 | To study measurement&calibration of Bimetallic Thermometer | 02 | CO2 |
| 7 | To study demonstration of Bourdon Tube | 02 | CO1 |
| 8 | To study demonstration of Diaphragm Pressure Gauge | 02 | CO1 |
| 9 | To find Co-efficient of Orifice meter | 04 | CO2 |
| 10 | To measure level by Air Purge Method | 04 | CO2 |
| 11 | To study demonstration of Optical Pyrometer | 02 | CO1 |
| 12 | To plot Control Valve Characteristics | 04 | CO4 |
| 13 | To study demonstration of Gas Liquid Chromatography | 02 | CO1 |
| 14 | Calibration of Rotameter | 02 | CO2 |
| Total | | 40 | |

8. IMPLEMENTATION STRATEGY (PLANNING)

1. Teaching Plan/Tutorials
2. Minimum no of practical/assignments/demonstration etc.
3. Guest/Expert lecture
4. Presentation
5. Case Study
6. Self-learning online resources

9. LEARNING RESOURCES

1. COURSE DETAILS

Programme: Chemical Engineering
Course: #Mass Transfer Operation
Course Code: MTO 190617

Semester: VI
Group: A*
Duration: 16 Weeks

2. TEACHING AND EXAMINATION SCHEME

| Scheme of Instructions and Periods per Week | | | | | Examination Scheme and Maximum Marks | | | | | | | | |
|---|--------------------|------------------|-------------------|----------------------|--------------------------------------|-------|-----|----|----|----|----|----|-------|
| Theory Hrs L | Practical Hrs P | Drawing Hrs D | Tutorial Hrs T | Credits (L+P+D+T) | Theory Paper Duration and marks(ESE) | | SSL | TA | TH | TW | PR | OR | TOTAL |
| | | | | | Hours | Marks | | | | | | | |
| 03 | 02 | -- | 1 | 06 | 03 | 70 | 20 | 10 | 70 | 50 | 50 | -- | 200 |

3. COURSE OBJECTIVE:

After study of Course the students will be able understand the mechanism of diffusion, operate and control various parameters related mass transfer equipment. They compare and select different mass transfer operations with respective to applications. They deal with equipment related to mass transfer operations like absorption, distillation, extraction, drying & crystallization. They will be able to handle the said equipment safely & effectively.

4. SKILL COMPETENCY:

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

Safely use of chemical process plant equipment for mass transfer operation.

5. COURSE OUTCOMES(COs) At the end of the semester student will be able to: -

| CO No. | COURSE OUTCOME | Bloom's LEVEL |
|--------|--|-----------------------------|
| CO1 | Apply the basic concept of Mass Transfer | Remember, Understand, Apply |
| CO2 | Use gas absorption and extraction as a separation technique in process industries. | Remember, Understand, Apply |
| CO3 | Use various distillation methods in process industries. | Understand, Apply |
| CO4 | Select the dryer for required unit process. | Understand, Apply |
| CO5 | Calculate the yield of crystals. | Understand, Apply |

6. COURSE CONTENTS

| Sr. No. | TOPIC/Sub-topic | Hours | Marks | Cos |
|---------|--|-------|-------|-----|
| 1 | 1.0 DIFFUSION : 1.1 Introduction, Role of diffusion in mass transfer 1.2 Molecular diffusion, Fick's law Steady state molecular diffusion 1.2.1. Diffusion of A through non diffusing B. 1.2.2. Equimolar diffusion 1.3 Diffusivity of gases, liquids and solids | 04 | 08 | CO1 |
| 2 | 2.0 MASS TRANSFER COEFFICIENTS : 2.1 Introduction, Theory of Mass transfer, Film Theory, Penetration Theory, Surface renewal Theory 2.2 Interphase mass transfer 2.3 Local and overall mass transfer coefficients | 04 | 06 | CO1 |
| 3 | 3.0 GAS ABSORPTION : 3.1 Introduction, Characteristics of ideal liquid solutions. Choice of solvent for absorption 3.2 Concept of equilibrium, minimum liquid-gas ratio, material balance. 3.3 Hydrodynamics of packed column: Loading and flooding of packed column 3.4 Concept of HETP, NTU and HTU. 3.5 Gas absorption Equipment: Mechanically agitated vessel, packed column, types of packing, Characteristics of packing, Channelling in packed column | 06 | 08 | CO2 |
| 4 | 4.0 EXTRACTION : 4.1 Introduction, Comparison between liquid-liquid extraction and Distillation 4.2 Selection of solvent, ternary system, Triangular diagram. 4.3 Extraction equipment- Stage wise contractors, mixer settlers, sieve tray, spray towers, packed towers, mechanically agitated tower, Rotating disc contactor. | 06 | 08 | CO2 |

| | | | | |
|-------|---|----|----|-----|
| 5 | 5.0 DISTILLATION : 5.1 Concept of distillation, boiling point diagram, effect of pressure on boiling point diagram. 5.2 Raoult's law, Henry's law, vapour liquid equilibrium diagram. 5.3 Calculation of vapour phase composition using relative volatility 5.4 Methods of Distillation : Differential distillation & derivation of Rayleigh's equation. Equilibrium or flash distillation. 5.5 Problems based on equilibrium & differential distillation. 5.6 Rectification : Derivation of rectifying & stripping line equation, ideal plate calculation using McCabe – Thiele method. 5.7 Effect of feed condition on slope of q-line, 5.8 Total, minimum and optimum reflux ratio. 5.9 Construction and comparison of packed & plate column 5.10 Azeotropes : Maximum boiling & minimum boiling azeotrope, 5.11 Steam distillation. | 16 | 24 | CO3 |
| 6 | 6.0 DRYING : 6.1 General principles, properties of air moisture mixture Moisture content on dry basis, wet basis, bound, unbound, Free, critical and equilibrium moisture content 6.2 Rate of batch drying, drying curve- constant rate & falling rate period ,total time of drying & problems based on the same. 6.3 Mechanism of batch drying, Classification : Direct Dryer indirect dryer. 6.4 Tray drier, rotary drier drum drier, spray drier. Fluidized bed driers | 06 | 08 | CO4 |
| 7 | 7.0 Crystallization: 7.1 Concept of crystallization, mechanism, saturation, super Saturation, solubility curves 7.2 Method of super saturation, Mier's super saturation theory 7.3 Crystallization equipment: Agitated tank crystallizer, vacuum Crystallizer, Oslo crystallizer and Swenson-Walker crystallizer 7.4 Material balance, numerical based on % yield and % recovery | 06 | 08 | CO5 |
| TOTAL | | 48 | 70 | |

7. LIST OF PRACTICALS/ASSIGNMENTS/EXERCISES/TUTORIALS/DRAWINGS

Term Work consists of Journal containing minimum 10no of experiments/Assignments:

| Sr. No. | Title of Experiment/Assignment/Exercise/Tutorial/Drawings | Approx.Hrs required | COs |
|--------------|---|---------------------|-----|
| 1. | To find rate of drying under atmospheric pressure/ vacuum. | 04 | CO4 |
| 2 | To separate a binary mixture by simple distillation. | 04 | CO3 |
| 3 | Study of different types of packing. | 02 | CO3 |
| 4 | Hydrodynamics in packed tower-study a)Flooding point b)Loading point | 04 | CO2 |
| 5 | To find NTU by using absorption column | 04 | CO2 |
| 6 | To find distribution coefficient for liquid system. | 02 | CO2 |
| 7 | Liquid-Liquid extraction byPacked Tower | 02 | CO2 |
| 8 | Liquid-Liquid extraction bySpray Tower | 02 | CO2 |
| 9 | To determine diffusivity of vapour of volatile liquid in air. | 02 | CO1 |
| 10 | To plot binodal curve ternary system | 02 | CO2 |
| 11 | Study of different types of plate column | 02 | CO3 |
| 12 | Draw solubility and supersolubility curve | 02 | CO5 |
| Total | | 32 | |

List of Tutorials

| Sr. No. | Title of Tutorial (any eight) | Approx.Hrs required | COs |
|---------|--|---------------------|-----|
| | Total | 16 | |
| 1 | Tutorial on diffusion, one component diffusing through stagnant layer, equimolar counter current diffusion | 2 | CO1 |
| 2 | Tutorial on mass transfer coefficient. | 2 | CO1 |
| 3 | Tutorial on percentage recovery of solute in gas absorption | 2 | CO2 |
| 4 | Tutorial on minimum solvent requirement in gas absorption | 2 | CO2 |
| 5 | Tutorial on simple distillation, flash distillation | 2 | CO3 |
| 6 | Tutorial on rectification. | 2 | CO3 |
| 7 | Tutorial on Extraction | 2 | CO2 |
| 8 | Tutorial on drying. | 2 | CO4 |
| 9 | Tutorial on crystallization | 2 | CO5 |

8. IMPLEMENTATION STRATEGY (PLANNING)

1. Teaching Plan/Tutorials
2. Minimum no of practical/assignments/drawings etc.
3. Guest/Expert lecture
4. Presentation
5. Online learning resources.

9. LEARNING RESOURCES

3. COURSE OBJECTIVE

The diploma students as a technician must be able to solve the problems at the shop floor. The project work cultivate the systematic methodology for problem analyzing & solving using acquired technical knowledge which also exhibit their ability to work in a team, develop planning, & execute skills.

4. SKILL COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences

- Plan innovative/creative solutions independently and/or collaboratively to integrate various competencies acquired during the semesters to solve/complete the identified problems/task/shortcomings faced by industry/user related to the concerned occupation.
- Solve the identified problem/task faced by industry/user related to the concerned occupation by integrating the various types of skills acquired during the programme.

5. COURSE OUTCOMES(COs) At the end of the semester student will be able to: -

| CO No. | COURSE OUTCOME | Bloom's LEVEL |
|--------|---|-----------------------------|
| CO1 | Write the problem/task specification related to the process industries | Remember, Understand |
| CO2 | Select, collect and use required information/knowledge to solve the problem/complete the task. | Remember, Understand, Apply |
| CO3 | Assess the impact of the project on society and environment | Remember, Understand, Apply |
| CO4 | Prepare 'project proposals' with action plan and time duration before beginning of project and technical project report after the performing. | Remember, Understand, Apply |
| CO5 | Communicate effectively and confidently as a member and leader of team. | Apply |

6. Identification of projects and allocation methodology to faculty members and relevance of the projects and their contribution towards attainments of PO's

The knowledge gained by studying various Courses separately utilized as a single task. The topic could be on plant design, specific equipment, process development, manufacturing process, live industrial problem etc. The project work involves experimental / theoretical / computational work. It is expected to do necessary literature survey by referring current journals belonging to chemical engineering, reference books & internet.

The department Head /Incharge/ Co-ordinator will form the balanced groups of maximum four students per group. The project groups are formed, project topics are identified based on the group potential, feasibility, availability of time, cost and project guides are assigned in preceding semester.

A brief synopsis of the project to be submitted to the HOD & guide. The synopsis should include project title, aim, block diagram, list of components required, & brief working whichever necessary. The students should make sure that all the requisites are available in the local market.

Student can select any one problem/project work from following categories.

- a) Literature survey based projects: Project related with collection tabulation, classification, analysis & presentation of the information. Topic selected must be related with latest technological developments, and should not be a part of diploma curriculum. Report should be of min 60 pages.
- b) Industry sponsored projects- project related with solving the problems identified by industry should be selected. One person / engineer from industry is expected to work as co-guide along with guide from institution
- c) Design & fabrication of mechanisms, machines, Devices, etc. Report involving aspects of designing & fabricating should be prepared & submitted.
- d) Maintenance based projects: The institute may have some machine/ equipment/ system which need upgrading . Students may select the specific machines/equipment/system. Upgrade it. The systematic procedure for maintenance to be followed and the report of the activity be submitted.
- e) Environmental management systems projects: Projects related with pollution control, Solid waste management, liquid waste management, Industrial hygiene, etc, Working model or case study should be undertaken.
- f) Project can be selected other than the area specified above. Project should provide viable and feasible solution to the problem identified.

Based on above criteria and relevance to contribution towards attainment of POs, the project topics are finalized group-wise and groups are allocated to faculties based on their area of expertise.

7 Process for monitoring and evaluation, process to assess individual and team performance

- i. The students are asked to prepare and submit synopsis and detail implementation plan of 16 weeks to their respective guides.
- ii. Interaction between students and project guide to discuss implementation methodology.
- iii. The project guide monitors the progress of implementation on continuous basis.
- iv. Final evaluation of project by examiners through presentation, demonstration and viva-voice.

8. Methodology to assess individual/collective contribution/understanding:

a. Internal evaluation (50 marks) by project guide.

Project Evaluation:

| Phase | Marks |
|--------------------------|-------|
| Phase I | |
| Synopsis Approval | 5 |
| Topic Relevance | 5 |
| Topic Objective | 5 |
| Phase II | |
| Topic Outcome | 5 |
| Methodology | 5 |
| Mid Review | 5 |
| Phase III | |
| Report Submission | 10 |
| Approval of Presentation | 10 |

b. External evaluation (50 marks) by expert from industry/institute (external examiner)

The students demonstrate the prototype/ working projects and give power point presentation in front of external examiner. Internal and external examiners evaluate the student on the following aspects:

- a) Understanding and completeness of the Project
- b) Approach to the solution of problem
- c) Planning and implementation
- d) Design and testing procedure
- e) Project Report

1. COURSE DETAILS

| | |
|--|--------------------------|
| Program: Chemical Engineering | Semester: VI |
| Course: Petroleum Refining & Petrochemicals | Group:A* |
| Code:PRP190619 | Duration:16 Weeks |

1. TEACHING AND EXAMINATION SCHEME

| Scheme of Instructions and Periods per Week | | | | | Examination Scheme and Maximum Marks | | | | | | | | |
|---|---------------------|-------------------|--------------------|----------------------|--------------------------------------|-------|-----|----|----|----|----|----|-------|
| Theory Hrs. L | Practical Hrs. P | Drawing Hrs. D | Tutorial Hrs. T | Credits (L+P+D+T) | Theory Paper Duration and marks(ESE) | | SSL | TA | TH | TW | PR | OR | TOTAL |
| | | | | | Hours | Marks | | | | | | | |
| 4 | 2 | -- | -- | 6 | 3 | 70 | 20 | 10 | 70 | 50 | -- | -- | 150 |

2. COURSE OBJECTIVE

To study of various petroleum products, important tests and refinery operations, also to provide manufacturing processes of various petrochemicals.

3. SKILL COMPETENCY:

Aim of this course is to help the students to attain following industry identified competency through various teaching learning experiences:

Identify quality of various petroleum products by various testing methods.

4. COURSE OUTCOMES(COs) At the end of the semester student will be able to: -

| CO No. | COURSE OUTCOME | Bloom's LEVEL |
|--------|---|----------------------|
| CO1 | Classify various types of petroleum products and their important properties. | Remember, Understand |
| CO2 | Use various petroleum refining operations. | Understand, Apply |
| CO3 | Classify various petrochemicals and safety aspects. | Understand, Apply |
| CO4 | Select the raw material, reaction, process condition and manufacturing process of typical petrochemicals. | Understand, Apply |

5. COURSE CONTENTS

| Sr No | Topic/Sub topic | Hours | Marks | COs |
|-------|---|-------|-------|-----|
| 1. | Introduction to Petroleum Refining 1.1 Indian Petroleum Industry overview 1.2 Origin of petroleum 1.3 Composition of petroleum 1.4 Characteristics of crude, Desalting of crude 1.5 Exploration Methods, Scientific methods for petroleum survey, Rotary drilling Rigs 1.6 Flow sheet of overall Refinery operations. | 09 | 10 | CO1 |
| 2. | Refining and testing : 2.1 Fractional distillation of crude oil. 2.2 Products of fractional distillation of crude oil, their properties, uses and their boiling ranges. 2.3 Refinery product characteristics, Flash point, fire point, Smoke point, pour point, Cloud point, Viscosity Index, aniline point, Diesel index, octane number and anti-knocking agent | 09 | 10 | CO1 |
| 3. | Unit processes in Refineries 3.1 Types of Cracking 3.2 Thermal cracking – Coking, visbreaking 3.3 Catalytic cracking - Fluidized bed Catalytic Cracking 3.4 Comparison between thermal and Catalytic cracking 3.5 Hydrocracking, Reforming, Isomerization 3.6 Alkylation – Hydrofluoric acid process, Sulphuric acid process, Comparison, Polymerization | 20 | 22 | CO2 |
| 4. | Overview of petrochemicals 4.1 Petrochemicals from methane 4.2 Petrochemicals from ethylene 4.3 Petrochemicals from propylene 4.4 Petrochemicals from BTX | 03 | 03 | CO3 |
| 5. | C1, C2, C3, C4 Petrochemicals and Aromatics 5.1 Naphtha steam cracking 5.2 C1- Methanol, Formaldehyde, Chloromethanes 5.3 C2- Vinyl chloride 5.4 C3 – Acrylonitrile, Isopropanol, Acetone 5.5 C4 – Butyl alcohol from butane, oxo Process. 5.6 Aromatics – Cumene, Phenol | 20 | 22 | CO4 |
| 6. | Hazards and safety 6.1 Hazards associated in petrochemical industry 6.2 Safety in petrochemical industry. | 03 | 03 | CO3 |
| | | 64 | 70 | |

6. LIST OF PRACTICALS/ASSIGNMENTS

Term Work consists of Journal containing minimum Ten no of experiments/ Demonstration/Assignments.

| Sr. No. | Title of Experiment/Assignment/Exercise/Tutorial/Drawings | Approx.Hrs required | Cos |
|---------|--|---------------------|-----|
| 1 | To determine the viscosity and viscosity Index of given oil at different temperatures with the help of Redwood viscometer. | 04 | CO1 |
| 2 | To determine the flash point by Pensky Martin apparatus | 04 | CO1 |
| 3 | To determine Flash point by Abel's apparatus | 04 | CO1 |
| 4 | To determine aniline point and Diesel Index of a given sample | 04 | CO2 |
| 5 | Preparation of sodium Citrate | 02 | CO3 |
| 6 | Preparation of Nitrobenzene | 02 | CO4 |
| 7 | Preparation of m-di nitrobenzene | 04 | CO4 |
| 8 | Preparation of Aniline | 04 | CO4 |
| 9 | Preparation of Picric acid | 04 | CO3 |
| 10 | To determine Pour point and cloud point of given sample. | 04 | CO1 |
| 11 | To determine smoke point of given sample. | 02 | CO1 |
| 12 | ASTM distillation of given sample. | 04 | CO2 |
| 13 | Assignment on Petroleum refining | -- | CO1 |
| 14 | Assignment on Petro chemicals | -- | CO3 |
| Total | | 42 | |

7. IMPLEMENTATION STRATEGY (PLANNING)

Manufacturing processes should be explained with flow chart. Uses of each product should be mentioned.

1. Teaching Plan/Tutorials
2. Minimum no of practical/assignments/Demonstration.
3. Guest/Expert lecture
4. Presentation
5. Case Study
6. Online learning resources.

8. LEARNING RESOURCES

| Sr. No. | Title of Book | Author | Publication |
|---------|--|-------------------|--|
| 1 | Petroleum Refining | James Garry | Marcel Dekker, Inc |
| 2 | Modern Petroleum Refining Processes | Bhaskara Rao | Oxford & IBH Refining Processes Publishing Co Pvt. |
| 3 | Petrochemicals | Peter Wiseman | John Wiley & Sons, New York |
| 4 | Shreve's Chemical process Industries | George .T. Austin | McGraw Hill Publications |
| 5 | Handbook of petrochemicals and processes | G.Margaret Wells | Gower Publishing |

| 4. | External | Ms Nishita Parekh |  |
| | | Organization: MPSTME, Vile Parle | |

1. COURSE DETAILS

Program: Chemical Engineering
Course: # Computer Aided Drafting, Design and Estimation (CADD & Estimation)
Course Code: CAD190620

Semester: VI
Group: A*

Duration: 16 Weeks

2. TEACHING AND EXAMINATION SCHEME

| Scheme of Instructions and Periods per Week | | | | | Examination Scheme and Maximum Marks | | | | | | | | |
|---|--------------------|------------------|-------------------|----------------------|--------------------------------------|-------|-----|----|----|----|----|----|-------|
| Theory Hrs L | Practical Hrs P | Drawing Hrs D | Tutorial Hrs T | Credits (L+P+D+T) | Theory Paper Duration and marks(ESE) | | SSL | TA | TH | TW | PR | OR | TOTAL |
| | | | | | Hours | Marks | | | | | | | |
| 2 | 4 | - | - | 6 | 03 | 70 | 20 | 10 | 70 | 50 | 50 | - | 200 |

3. COURSE OBJECTIVE

With the development of various software programs for engineering field the requirement to learn the computer aided graphics, designs and drafting software AUTOCAD, simulation software has been emphasized to be compulsory.

This subject deals with learning design and drafting of engineering and equipment drawing with the help of AutoCAD. It also covers basic features of various process and piping layouts prepared on AutoCAD. Students will also familiarizes with assembly drawing of major plant equipments, their mechanical design and cost estimation.

4. SKILL COMPETENCY

The aim of this course is to help students to attend the following industry identified competency through various teaching learning experiences:

Prepare the basic Engineering documents according to process requirement.

5. COURSE OUTCOMES(COs) At the end of the semester student will be able to :-

| CO No. | COURSE OUTCOME | Bloom's LEVEL |
|--------|--|---------------|
| CO1 | Choose basic drafting commands in AutoCAD | Apply |
| CO2 | Prepare PFD, P & ID, Equipment layouts, Tank-farms & plant layout for the given process. | Apply |
| CO3 | Identify the process parameter of equipment's for process plant. | Remember |
| CO4 | Estimate BOM for heat exchanger & reaction vessels by using assembly drawing. | Apply |
| CO5 | Estimate the cost of the given objects | Apply |

6. COURSE CONTENTS

| Sr. No. | TOPIC/Sub-topic | Hours | Marks | COs |
|---------|---|-------|-------|-----|
| 1 | 1.0 Introduction to Computer Aided Design & Drafting 1.1 Fundamentals of AutoCAD and use of AutoCAD as a design and drafting tool 1.2 Familiarization of commands of drawing editor and selection of AutoCAD menu 1.3 All basic DRAW, DISPLAY, EDIT, INQUIRY and BLOCK commands. 1.4 OBJECT SNAP MODES in AutoCAD commands. 1.5 Configuration of AutoCAD | 03 | 07 | CO1 |
| 2 | 2.0 Creating a drawing, setting up work areas: 2.1 Organizing information with layers. 2.2 Setting commands and 3D commands for drawing graphs, 2D and 3D views. 2.3 Labelling and dimensioning of drawing. 2.4 Various attribute commands – ATTDEF, ATTDISP, ATTEDIT and ATTEXT. | 02 | 04 | CO1 |
| 3 | 3.0 Block Diagram & Process Flow Diagram, Utility line Diagram, 3.1 IS-3232, 1976, symbols for pipelines, valves, pumps, compressor, Heating or cooling arrangements, furnace and boilers, process vessels, storage vessels, driers, separators, filters, centrifuges, mixers, conveyors, and miscellaneous 3.2 Block Diagram, Detailed process flow diagram 3.3 Introduction to utility line diagram (ULD) and use of ULD in piping engineering. 3.4 Service fluid code for piping (IS-9446- 1980), 3.5 Utility Block Diagrams 3.6 Line identification & Numbering. | 05 | 12 | CO2 |
| 4 | 4.0 P& ID, Equipment Layout, Tank Farm and, Plant layout. 4.1 P& ID's for various plant equipment 4.2 P&ID's of various temperature, pressure and level Controls of columns, reactors, etc. 4.3 P&ID layout drawing of a chemical plant 4.4 Introduction to Equipment layout & Tank farm 4.5 Introduction to Plant layout | 06 | 12 | CO2 |
| 5 | 5.0 Assembly Drawing of major plant equipment: 5.1 Assembly drawing of – (a) heat exchanger (shell and tube type) (b) reaction vessel 5.2 Bill of material (BOM) , specifications and estimation of the above equipment. | 02 | 08 | CO4 |

| | | | | |
|--------------|---|----|----|-----|
| 6 | 6.0 Process Design of basic equipment. 6.1 Heat Exchanger (shell and tube) 6.2 Distillation column | 08 | 15 | CO3 |
| 7 | 7.0 Cost Estimation: 7.1 Aims and objectives of cost accounting, elements and classifications of costs, purpose and function of estimating, constituents of a job estimation and estimating procedures. 7.2 Mensuration, Determination of volume, total weight, surface area of fabricated equipment | 06 | 12 | CO5 |
| TOTAL | | 32 | 70 | |

7. LIST OF PRACTICALS/ASSIGNMENTS/DRAWINGS

Term Work consists of Journal containing minimum no. of 12 experiments (AutoCAD software)/Assignments/Drawings/Demonstration

| Sr. No. | Title of Experiment/Assignment/Exercise/Tutorial/Drawings | Approx.Hrs required | COs |
|--------------|--|---------------------|-----|
| 1 | DRAW : Line, Circle, Arc, Text, Dtext, Pline etc | 06 | CO1 |
| 2 | DISPLAY : Attedit, Dview, pan, plan, Redraw, Redrawall, Regen, Regenall, Regenauto, View, Zoom Etc. | 06 | CO1 |
| 3 | EDIT : Array, Attedit, Break, Chamfer, Change, Copy, Divide, Erase, Explode, Extend, Fillet, Move, Mirror, Measure, Oops, Offset, Rotate, Select, Scale, Stretch, Trim etc | 06 | CO1 |
| 4 | BLOCKS : Attdef, Base, Block, Insert, MINSERT, Wblock etc | 06 | CO1 |
| 5 | OSNAP : CENTER, ENDpoint, INsertion, INTersection, Apparent Intersection, MIDpoint, NEArrest, NODE, NONE, PERpendicular, QUICK, QUADRant, TANGent etc | 06 | CO1 |
| 6 | 3D command: Addition, subtraction, Extrusion, 3D view | 04 | CO1 |
| 7 | To prepare Block Diagram and PFD of a Chemical Process Plant on AutoCAD | 04 | CO2 |
| 8 | To prepare layout of PFD Symbols (IS-3232) on AutoCAD | 04 | CO2 |
| 9 | To prepare detailed PFD on AutoCAD. | 04 | CO2 |
| 10 | To prepare ULD on AutoCAD. | 04 | CO2 |
| 11 | To study basic features of P&ID's prepared on AutoCAD | 04 | CO2 |
| 12 | To prepare Equipment layout & Tankfarm layout drawing on AutoCAD. | 04 | CO2 |
| 13 | To prepare plant layout of a chemical process plant on AutoCAD. | 04 | CO2 |
| 14 | Assembly drawings of reaction vessel and heat exchanger. | 04 | CO4 |
| 15 | Preparation of BOM and cost estimation of the unit operation | 04 | CO5 |
| 16 | Design of heat exchanger/evaporator/Reactor/distillation column using simulation software | 06 | CO3 |
| 17 | Demonstration of Piping software use in process industry. | 04 | CO1 |
| Total | | 80 | |

8. IMPLEMENTATION STRATEGY (PLANNING)

1. Each student should be given to practice AutoCAD software independently.
2. In addition student should be taught to make actual drawings using drafting tools.
3. Drawings prepared by hand and on AutoCAD have to be evaluated by the teacher on completion.
4. All topics should be covered as per lesson plan.
5. Guest/Expert Lecture
6. Online learning resources

9. LEARNING RESOURCES

| Sr.No. | Title of Book | Author | Publication |
|--------|---|----------------------------|---|
| 1 | Inside AutoCAD | D. Raker H. Rice | BPB Publication, New Delhi |

| 02 | 04 | - | - | 06 | 03 | 70 | 20 | 10 | 70 | 50 | 50 | - | 200 |

3. COURSE OBJECTIVE

The design engineering and construction of process plants involves a multidisciplinary team effort. Plant layout and design of piping systems constitutes a major part of the design and engineering effort. The objective of this course is to provide the students the basic knowledge and skills in discipline of piping engineering includes Pipe sizing, material selection, Leak testing and piping drawing.

4. SKILL COMPETENCY

The aim of this course is to help students to attend the following industry identified competency through various teaching learning experiences:

Maintain piping system for trouble free functioning in chemical Plant.

5. COURSE OUTCOMES(COs) At the end of the semester student will be able to :-

| CO No. | COURSE OUTCOME | Bloom's LEVEL |
|--------|---|-------------------|
| CO1 | Identify the relevant pipes for various chemical processes as per standard | Remember, Apply |
| CO2 | Select significant material of pipe for various chemical processes. | Remember, Apply |
| CO3 | Choose relevant insulation material and accessory for piping system | Apply |
| CO4 | Identify relevant leak testing and heat tracing methods for various chemical processes. | Apply |
| CO5 | Interpret piping drawing for maintenance. | Understand, Apply |

6. COURSE CONTENTS

| Sr. No. | TOPIC/Sub-topic | Hours | Marks | COs |
|---------|---|-------|-------|-----|
| 1 | PIPING FUNDAMENTALS 1.1 Introduction to piping: Pipe, classification of pipe. 1.2 Pipe size, pipe wall thickness, schedule number. 1.3 Standards referred by piping engineer: API, ASME, BS, IS. 1.4 Fundamentals of design codes and selection criteria for piping. 1.5 Color coding of piping as per types of fluid passing through pipes (IS 2379:1990). | 05 | 12 | CO1 |
| 2 | PIPING MATERIAL, PROPERTIES AND GASKET. 2.1 Selection of material for piping 2.2 Material properties of piping: <ul style="list-style-type: none"> - Chemical Properties. - Mechanical Properties: Modulus of elasticity, yield strength, elongation and reduction of areas, hardness, toughness. - Physical Properties: Density, thermal conductivity, thermal expansion, specific heat. 2.3 Metallic Material: Ferrous metals, Cast Iron, Steel, Copper and alloys, aluminum and alloys. 2.4 Gaskets: Functions and properties, types of gasket and their selection. | 05 | 12 | CO2 |
| 3. | PIPING INSULATION 3.1 Design parameters of insulation system design for piping, Service types for insulation design. 3.2 Critical thickness of insulation, estimating thickness of insulation, optimum thickness of insulation. 3.3 Insulation materials: Calcium silicate, cellular glass, Fiberglass And mineral wool, Phenolic foam, Polyurethane foam. 3.4 Accessory materials for Insulation: Acrylic latex mastic, Aluminum jacketing, Aluminum banding, FRP jacketing, Stainless steel jacketing, Mesh fabric. 3.5 Heat loss through insulation. | 06 | 12 | CO3 |

| | | | | |
|-------|---|----|----|-----|
| 4. | PIPING INSTALLATION, LEAK TESTING AND HEAT TRACING 4.1 Piping Installation: Installation Drawings, Erection Planning, Cold spring, Joint alignment. 4.2 Leak testing: Methods of leak testing, Hydrostatic, Pneumatic, Vacuum and static head testing. 4.3 Heat Tracing: Types of heat tracing system, Steam tracing, Self-regulating heater, skin effect, Impedence heat tracing and Induction heating. Selection criteria for tracing system. | 07 | 14 | CO4 |
| 5 | PIPING DRAWINGS 5.1 Information sources for piping arrangement drawings, layout procedure. 5.2 Pipe rack spacing and rack drawing organization. 5.3 Drawing formals – Single line drawings. – Double line drawings. 5.4 Piping Isometric drawing: – Isometric piping symbols. – Isometric dimension and text callouts' – Isometric offset | 09 | 20 | CO5 |
| TOTAL | | 32 | 70 | |

7. LIST OF PRACTICALS/ASSIGNMENTS

Term work consist of journal containing minimum 12 Experiments/assignment/ demonstration /Drawing

| Sr. No. | Title of Experiment/Assignment/Exercise/Tutorial/Drawings | Approximate hrs. required | COs |
|---------|--|---------------------------|-----|
| 1 | Identify the different types of Pipes, Joints, Washers and related accessories used in chemical engineering Plants | 04 | CO1 |
| 2 | Describe the condition of given type of pipes and joints | 04 | CO1 |
| 3 | Determine the fluid velocity for given pipe size for different flow rate | 04 | CO1 |
| 4 | Describe with sketches the condition of given gaskets | 04 | CO2 |
| 5 | Use the drafting software to draw the sectional view of given pipe with insulation | 04 | CO3 |
| 6 | Determine the heat loss from hot/cold insulation on pipe(s) | 04 | CO3 |
| 7 | Describe with sketches the condition of the given steam tracing system. | 04 | CO4 |
| 8 | Describe with sketches the conditions of the given self regulating parallel resistance heat tracer. | 04 | CO4 |

| | | | |
|----|---|----|-----|
| 9 | Perform the leak test to determine the pressure drop in straight pipe. | 04 | CO4 |
| 10 | Use the drafting software to draw the given piping line symbol. | 06 | CO5 |
| 11 | Use the drafting software to draw the pipe rack column spacing | 06 | CO5 |
| 12 | Use the drafting software to draw the component of given pump suction and discharge piping system | 06 | CO5 |
| 13 | Use the drafting software to draw the piping isometric symbols. | 06 | CO5 |
| 14 | Use the drafting software to draw the piping isometric of given system. | 06 | CO5 |
| 15 | Use the drafting software to draw the plant layout of given system. | 06 | CO5 |
| 16 | Use the drafting software to draw the piping general arrangement of given system. | 06 | CO5 |
| 17 | Use the drafting software to draw the single line drawing for given system | 06 | CO5 |
| 18 | Use the drafting software to draw the double line drawing for given system | 06 | CO5 |
| | Total | 90 | |

8. IMPLEMENTATION STRATEGY (PLANNING)

1. Teaching Plan/Tutorials
2. Assignments
3. Guest/Expert lecture

3. COURSE OBJECTIVE

After studying this course, students will be able to solve the problems of Linear and Non-Linear equation, Data interpolation, Numerical integration and differential equation using Numerical analysis software and computer facilities. This will help students to solve and analyse the problems in chemical engineering.

4. SKILL COMPETENCY

The aim of this course is to help students to attend the following industry identified competency through various teaching learning experiences:

Apply Numerical Method to solve the basic chemical Engineering problems.

5. COURSE OUTCOMES(COs) At the end of the semester student will be able to :-

| CO No. | COURSE OUTCOME | Bloom's LEVEL |
|--------|---|-------------------|
| CO1 | Use Scilab/Matlab/Python to visualize the data and solve problems. | Understand, Apply |
| CO2 | Apply Numerical methods to solve linear system and non-linear system equations in chemical Processes. | Understand, Apply |
| CO3 | Calculate Numerical Integration applying the Trapezoidal Rule, Simpson's Rule used in Chemical processes. | Apply |
| CO4 | Apply Numerical methods for data interpolation chemical Processes. | Apply |
| CO5 | Select Numerical Methods to solve ordinary differential equation related to chemical processes. | Remember, Apply |

6. COURSE CONTENTS

| Sr. No. | TOPIC/sub-topic | Hours | Marks | COs |
|---------|--|-------|-------|-----|
| 1 | Introduction to Scilab/Matlab/Python 1.1. Installation and running. 1.2. Variables, lists, tuples and arrays 1.3. Conditional statements 1.4. Iterative loops 1.5. Functions 1.6. Plotting graphs | 12 | 17 | CO1 |
| 2 | Solution of Linear Equations 2.1 Gaussian Elimination 2.2 Jacobi Iteration 2.3 Gauss-Seidel Iteration 2.4 Applications in linear mass balances etc. | 6 | 9 | CO2 |
| 3 | Nonlinear Equations 3.1. Newton's Method 3.2. Successive Substitution 3.3. Applications to EOS, friction factor etc. | 6 | 9 | CO2 |
| 4 | Interpolation 4.1. Concept of least squares 4.2. Polynomial fitting by least squares 4.3. Lagrangian interpolation 4.4. Applications in experimental data | 6 | 9 | CO4 |
| 5 | Numerical Integration 5.1. Simpsons Rule 5.2. Gaussian Quadrature | 6 | 9 | CO3 |
| 6 | Differential Equations 6.1. Numerical approximations of derivatives 6.2. Euler's Method 6.3. Fourth order RK Method 6.4. Applications in unsteady balances and reactions | 12 | 17 | CO5 |
| Total | | 48 | 70 | |

7. LIST OF PRACTICALS/ASSIGNMENTS/EXERCISES/TUTORIALS/DRAWINGS

TermWork consists of Journal containing minimum no. of 08 experiments/ Assignment/Tutorial by using Scilab/Matlab/Python

| Sr. No. | Title of Experiment/Assignment/Exercise/Tutorial/Drawings | Approx.Hrs required | COs |
|---------|---|---------------------|-----|
| 1 | Solve Numerical Based on Matrix inversion by Scilab/Matlab/Python | 02 | CO1 |
| 2 | Solve Numerical Based on Gaussian Elimination Method by Scilab/Matlab/Python | 02 | CO2 |
| 3 | Solve Numerical Based on Jacobi Iteration by Scilab/Matlab/Python | 02 | CO2 |
| 5 | Solve Numerical Based on Gauss-Seidel Iteration by Scilab/Matlab/Python | 02 | CO2 |
| 6 | Solve Numerical Based on Newton's Method by Scilab/Matlab/Python | 02 | CO2 |
| 7 | Solve Numerical Based on Successive Substitution Method by Scilab/Matlab/Python | 02 | CO2 |
| 8 | Solve Numerical Based on Polynomial fitting by least squares Method by Scilab/Matlab/Python | 02 | CO4 |
| 9 | Solve Numerical Based on Simpsons Rule by Scilab/Matlab/Python | 02 | CO3 |
| 10 | Solve Numerical Based on Euler's Method by Scilab/Matlab/Python | 02 | CO5 |
| | Total | 20 | |

8. IMPLEMENTATION STRATEGY (PLANNING)

1. Teaching Plan
2. Minimum number of Practical/Assignment
3. Self Learning online Resources
4. Worksheet for practice.
5. Guest/Expert lecture

9. LEARNING RESOURCES

| Sr. No. | Title of Book | Author | Publication |
|---------|--|---------------------------------------|--|
| 1 | Introductory methods of Numerical Analysis | Sastry S.S | PHI Learning, New Delhi - 11001, ISBN-81-203-1266-X |
| 2 | Numerical Method for Engineers | Chapra, Steven C., Canale Raymond P. | McGraw-Hill Publication Company Limited, New Delhi , 2005, ISBN |
| 3 | Numerical Methods | Jain, M.K., Jain R.K., Iyengar, S.R.K | New Age International (P) Limited, Publishers, New Delhi, 2014,/ISBN 13: 9788122433234 |
| 4 | Introduction to Scilab | Nagar, Sandeep | Independtly Published, 2016, ISBN 13:152015111X,9781520151113 |
| 5 | Automate the Boring Stuff with Python | Al Sweigart | No Starch Press. Publish Date. November 12, 2019, EAN/UPC 9781593279929 |
| 6 | MATLAB Programming for Engineers | Stephen J. Chapman | Cengage Learning India Pvt. Ltd.; Sixth edition (1 October 2019), ISBN-13 : 978-9353502874 |

11. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Sr. No. | TOPIC | Distribution of Theory Marks | | | |
|---------|--------------------------------------|------------------------------|---------|---------|-------------|
| | | R Level | U Level | A Level | Total Marks |
| 1 | Introduction to Scilab/Matlab/Python | - | 07 | 10 | 17 |
| 2 | Solution of Linear Equations | 04 | - | 05 | 9 |
| 3 | Nonlinear Equations | 04 | - | 05 | 9 |
| 4 | Interpolation | - | 04 | 05 | 9 |
| 5 | Numerical Integration | 04 | - | 05 | 9 |
| 6 | Differential Equations | 03 | 04 | 10 | 17 |
| Total | | 15 | 15 | 40 | 70 |

R Remember, U Understand, A Apply and above, (Bloom's revised taxonomy levels)

NOTE: This specification table provides general guidelines to assist students for their learning and to teachers to teach and assess students with respect to attainment of COs. The actual distribution of marks at different taxonomy levels (R, U, A) in the question paper may vary from above table.

12. COURSE EXPERT COMMITTEE MEMBERS

| Sr. No. | FACULTY | NAME | SIGNATURE |
|---------|----------|---|---|
| 1 | Internal | Mr. Nilesh R. Nagose |  |
| 2 | Internal | Mr. Milind M. Belwalker |  |
| 3 | Internal | Mrs. Jyoti S. Sangle |  |
| 4 | External | Dr. Ramesh V |  |
| | | Organisation: Ex- HOD, DJSCOE, Vile-Parle | |

1. COURSE DETAILS

| | |
|--------------------------------------|---------------------------|
| Program: Chemical Engineering | Semester: VI |
| Course: Project Management | Group: M |
| Course Code: PMG 190623 | Duration: 16 Weeks |

2. TEACHING AND EXAMINATION SCHEME

| Scheme of Instructions and Periods per Week | | | | | Examination Scheme and Maximum Marks | | | | | | | | |
|---|--------------------|------------------|-------------------|----------------------|--------------------------------------|-------|-----|----|----|----|----|----|-------|
| Theory Hrs L | Practical Hrs P | Drawing Hrs D | Tutorial Hrs T | Credits (L+P+D+T) | Theory Paper Duration and marks(ESE) | | SSL | TA | TH | TW | PR | OR | TOTAL |
| | | | | | Hours | Marks | | | | | | | |
| 03 | -- | -- | 1 | 4 | 03 | 100 | 20 | 10 | 70 | 25 | -- | -- | 125 |

3. COURSE OBJECTIVE

In brief, project management objectives are the successful development of the project's procedures of initiation, planning, execution, regulation and closure as well as the guidance of the project team's operations towards achieving all the agreed upon goals within the set scope, time, quality and budget standards.

4. SKILL COMPETENCY

The aim of this course is to help the students to attend the following industry identified Competency through various teaching learning experiences:

- Optimization of the allocated resources.
- Development and implementation of all project procedures in given constraints.

5. COURSE OUTCOMES(COs) At the end of the semester student will be able to :-

| CO No. | COURSE OUTCOME | Bloom's LEVEL |
|--------|--|-----------------------------|
| CO1 | Identify the basic need of project Management. | Remember, Understand, Apply |
| CO2 | Interpret the organizational structure with their roles and responsibility | Remember, Understand, Apply |
| CO3 | Solve the problems based on CPM and PERT | Remember, Understand, Apply |
| CO4 | Use contract management and performance measurement for evaluation of project and process for execution of project | Remember, Understand, Apply |
| CO5 | Select the steps for Closing the Project, Project Termination and Project Follow-up | Remember, Understand, Apply |

6. COURSE CONTENTS

| Sr. No. | TOPIC/Sub-topic | Hours | Marks | COs |
|---------|---|-------|-------|-----|
| 1 | Basics of Project Management 1.1. Introduction, 1.2. Need for Project Management, 1.3. Project Management Knowledge Areas and Processes, 1.4. The Project Life Cycle, 1.5. The Project Manager (PM), 1.6. Phases of Project Management Life Cycle, 1.7. Project Management Processes, 1.8. Impact of Delays in Project Completions, 1.9. Essentials of Project Management Philosophy, 1.10. Project Management Principles | 05 | 08 | CO1 |
| 2 | Project Identification and Selection: 2.1. Introduction, 2.2. Project Identification Process, 2.3. Project Initiation, 2.4. Pre-Feasibility Study, 2.5. Feasibility Studies, 2.6. Project Break-even point Project Planning: 2.7. Introduction, 2.8. Project Planning, 2.9. Need of Project Planning, 2.10. Project Life Cycle, 2.11. Roles, Responsibility and Team Work, 2.12. Project Planning Process, 2.13. Work Breakdown Structure (WBS) | 07 | 10 | CO1 |
| 3 | Organisational Structure and Organisational Issues: 3.1. Introduction, 3.2. Concept of Organisational Structure, 3.3. Roles and Responsibilities of Project Leader, 3.4. Relationship between Project Manager and Line Manager, Leadership Styles for Project Managers, 3.5. Conflict Resolution, 3.6. Team Management and Diversity Management, 3.7. Change management | 07 | 10 | CO2 |

| | | | | |
|--------------|--|----|----|-----|
| 4 | PERT and CPM: 4.1. Introduction, 4.2. Development of Project Network, 4.3. Time Estimation, 4.4. Determination of the Critical Path, 4.5. PERT Model, 4.6. Measures of variability, 4.7. CPM Model, 4.8. Network Cost System Resources Considerations in Projects: 4.9. Introduction, 4.10. Resource Allocation, 4.11. Scheduling, 4.12. Project Cost Estimate and Budgets, 4.13. Cost Forecasts | 10 | 16 | CO3 |
| 5 | Purchasing and Contracting for Projects: 5.1. Introduction, 5.2. Purchase Cycle, 5.3. Contract Management, 5.4. Procurement Process | 05 | 06 | CO4 |
| 6 | Project Performance Measurement and Evaluation: 6.1. Introduction, 6.2. Performance Measurement, 6.3. Productivity, 6.4. Project Performance Evaluation, 6.5. Benefits and Challenges of Performance Measurement and Evaluation, 6.6. Controlling the Projects Project Execution and Control: 6.7. Introduction, 6.8. Project Execution, 6.9. Project Control Process, 6.10. Purpose of Project Execution and Control | 06 | 08 | CO4 |
| 7 | Project Close-out, Termination and Follow-up: 7.1. Introduction, 7.2. Project Close-out, 7.3. Steps for Closing the Project, 7.4. Project Termination, 7.5. Project Follow-up Case Study | 08 | 12 | CO5 |
| TOTAL | | 48 | 70 | |

7. LIST OF TUTORIALS

Term Work consists of Journal containing minimum no. of 06 tutorials.

| Sr. No. | Title of Tutorials | Approx. Hrs required | COs |
|---------|--|----------------------|-----|
| 1. | Assignment on basics of project management | 02 | CO1 |
| 2. | Presentation based on selection of project. | 02 | CO2 |
| 3. | Problems on Pert | 02 | CO3 |
| 4 | Problems on CPM | 02 | CO3 |
| 5. | Assignment on purchase and performance measurement | 02 | CO4 |
| 6 | Assignment on project close out | 02 | CO5 |
| 7 | Case study based on industry | 02 | CO5 |
| 8 | Case study | 02 | CO5 |
| | Total | 16 | |

8. IMPLEMENTATION STRATEGY (PLANNING)

1. Teaching Plan/Tutorials
2. Minimum no of practical/assignments/drawings etc.
3. Guest/Expert lecture
4. Presentation
5. Case Study

8. LEARNING RESOURCES

| Sr. No. | Title of Book | Author | Publication |
|---------|--------------------|-----------------|--------------------------------------|
| 1 | Project management | David I Cleland | Mcgraw Hill International Edition |
| 2 | Project Management | Gopalakrishnan | Mcmillan India Ltd |

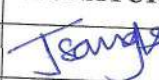

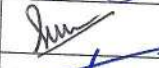

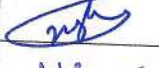

9. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Sr. No. | TOPIC | Distribution of Theory Marks | | | |
|---------|--|------------------------------|---------|---------|-------------|
| | | R Level | U Level | A Level | Total Marks |
| 1 | Basics of Project Management | 04 | 02 | 02 | 8 |
| 2 | Project Identification and Selection | 02 | 04 | 04 | 10 |
| 3 | Organizational Structure and Organizational Issues | 02 | 04 | 04 | 10 |
| 4 | PERT and CPM | 04 | 04 | 08 | 16 |
| 5 | Purchasing and Contracting for Projects | 02 | 02 | 02 | 6 |
| 6 | Project Performance Measurement and Evaluation | 02 | 02 | 04 | 8 |
| 7 | Project Close-out, Termination and Follow-up | 04 | 04 | 04 | 12 |
| | Total | 20 | 22 | 28 | 70 |

R Remember, U Understand, A Apply and above, (Bloom's revised taxonomy levels)

NOTE: This specification table provides general guidelines to assist students for their learning and to teachers to teach and assess students with respect to attainment of COs. The actual distribution of marks at different taxonomy levels (R, U, A) in the question paper may vary from above table.

| 9 | Shri J.S.Kulkarni, Head, Computer Engg.Dept. | Member |
| 10 | Shri A.B.Dongaonkar, Lecturer, IT Dept. | Member |
| 11 | Mrs.K.P.Bhave,Lecturer,Chemistry Dept. | Member |
| 12 | Shri G.J.Badwe,Training and Placement Officer | Member |
| 13 | Shri S.T.Khelkar,Controller of Examinations | Member |
| 14 | Shri L.B.Deshpande,Lecturer,Electronics Dept. | Member Secretary |

Department Level Committee (Department CO-Ordinators)

| Sr. No. | Name of the Faculty | Designation |
|---------|----------------------|--|
| 1 | Shri S. N. Ranshur | Lecturer, Civil Engineering |
| 2 | Shri A. S. Shukla | Lecturer, Mechanical Engineering |
| 3 | Shri D. G. Rajmandai | Lecturer, Electrical Engineering |
| 4 | Ms. P. J. Nikhade | Lecturer, Industrial/Digital Electronics |
| 6 | Shri S. A. Kamble | Lecturer, Plastics Engineering |
| 5 | Shri M. M. Belwalkar | Lecturer, Chemical Engineering |
| 7 | Shri P. H. Shah | Lecturer, Computer Engineering |
| 8 | Shri P. D. Rathod | Lecturer, Information Technology |

Certificate

The curriculum of the programme has been modified in the year 2019, as per the provision made in curriculum development process of Shri Bhagubhai Mafatlal Polytechnic, Mumbai. This is the **outcome based Curriculum of Diploma in Chemical Engineering programme**, which shall be implemented from academic year 2019-20.

| Total Marks = 70 | | | Total Marks = 104 | |

Controller of Examination

Secretary, CDC

Principal/Vice Principal

Date : 8th January,2022

To whomsoever it may concern

This is to certify that the curriculum-2019 of chemical engineering department at S.B.M Polytechnic is in line with the current requirement

The syllabus of scheme 2019 is well-design incorporating core engineering applications, emerging technologies and basic management skills.

The inplant training conducted in 5th semester gives the clear understanding about the industry standards and different products and processes.

Emerging courses like Pollution Control and waste Disposal, CADD & Estimation, Industrial Management, Process Instrumentation and Control etc. are much relevant to the chemical process industry.

Further the practice of reviving the curriculum frequently, which enables the courses to keep the pace with the industry and industrial revolution 4.0 requirement.

Looking forward to successful association.

LUPIN

To,
The Chemical Engineering Dept.
Shri Bhagubhai Mafatlal Polytechnic,
Irla, Vile Parle(W),
Mumbai-400056

KIND ATTN.: - Shri R.D.Shimpi

Subject: Regarding the revised syllabus of the Diploma course in
chemical Engg. of S.B.M.Polytechnic.

Respected Sir,

We congratulate H.O.D. Shri R.D.Shimpi and the whole chemical Engg. Department of S.B.M.P. for their revised syllabus. We have understood the new syllabus including emerging thrust area such as AUTO CAD, Energy system Engg, Advanced oxidation process, Reaction Engg, Thermodynamics etc. which enable their students to deliver the better performance in the industrial profession.

We state that the syllabus of the course is designed to fulfill the needs of the chemical industries and it can be considered bench mark for the other institutes in India.

We are ensuring the certificate of excellence for their curriculum.
